How to play

1. Find dot 1 and draw a straight line to dot 2, then 3, and so on, in order, until the last dot.
2. Each picture is one single line. The line never lifts, so jumps across the page are part of the picture.
3. Work with a sharp pencil or a fine pen (0.3 to 0.5 mm). Draw lightly at first: in the busy parts the dots are close together.
4. The last dot does not join the first one. Stop at the highest number.
5. Stuck on a number? It sits beside its own dot, usually on the outside of the line. Every picture has an answer picture at the back.

Difficulty

The pictures run from 520 dots at the start to 990 dots at the end. Start at picture 1 if you are new to extreme dot to dot, and treat the last pictures as a challenge for a long, quiet evening.

Tips

- Good light and a ruler (or a straight card edge) make long lines easy.
- Print on 100 gsm paper or heavier at 100% scale. Plain black and white is enough.
- Print the answer pages only when you need them.
